FUTURE FLOWER FANS IN PART OF DISPLAY GARDENS.
PUGET SOUND IN BACKGROUND.

THANK YOU

TO our many flower friends and customers we take this opportunity to express our thanks for the best season's business we have ever had.

The many repeat orders are especially gratifying because we know our bulbs are serving as our "Good Will Ambassadors." You have been kind with your suggestions and generous with your compliments, all of which prompts us to do our utmost in filling your orders to your complete satisfaction.

This season we are sending out our catalogs early as an experiment. By the time it is received the memory of your own daffodils, tulips and other spring flowering bulbs will be fresh in your mind. Perhaps in looking over your garden this spring you noticed spots in the borders or garden where a few bulbs planted this fall will fill in and make a colorful showing; a border of the cheerful little crocus or some of the more formal hyacinths; nodding daffodils and the stately tulips in such a fine array of colors, all have their places in a well planned garden.

Our new location bordering Puget Sound has proven to us that we can grow bulbs and flowers of superior quality. We can plant early and frosts are of minor importance, thereby assuring us a long growing season with bulbs well matured and ripened by harvest time.

Perhaps a brief history of our business will not be out of order at this time. Becoming interested in flowers at an early age, I began to grow gladiolus and dahlias commercially at 19. Seven years later an offer to become superintendent of a 40-acre bulb farm was accepted. This broadened the scope of my operations and enabled me to grow flowers by the millions. Soon after accepting this position I met a young lady as keenly interested in flowers as I was. Needless to say, a partnership was soon formed, and after five years we embarked on a small but growing business of our own. While our business primarily is growing bulbs and flowers for sale, we have never let the commercial side dominate the deep love of flowers we have always experienced, and we get just as much thrill now in finding the first early crocus in bloom as we ever did. We are enjoying the work that we like best and hope to be doing it for a long time to come.

In this catalog you will find many of the newer daffodils seldom found in ordinary lists. These new additions are improvements on the general run of daffodils commonly found in most gardens. We are discarding a number of the older sorts for better ones, which are now reasonable enough in price to be grown more extensively. So much more satisfaction is derived from growing a flower of real style and merit with no more work involved than some mediocre flower grown just because the bulbs are cheap. Quality is always remembered long after the price is forgotten.

We sincerely hope 1938 will prove to be a truly healthy, happy flower year for you all.

DAFFODILS are not only ideal as outdoor border flowers but also unsurpassed as cut flowers. The bright yellow blooms make a patch of sunshine to help brighten up any room. Some of the newer varieties of daffodils, such as Firetail, Diana Kasner, Helios, Croesus, and many others, with their bright orange, red, or red picotee trumpets, make striking bouquets, and the soft dainty colorings of such varieties as Hera, Jefta, Silver Star, John Evelyn, Lovenest, and others which combine so readily with the delicate shades of blues and pinks in other flowers, make very attractive centerpieces. Daffodils are fine keepers indoors, lasting for a week or more; and their cheerful brightness is greatly appreciated on the rainy, blustery days of March and April.

PLEASE READ CAREFULLY BEFORE ORDERING

ORDER EARLY—This has its advantages as you are sure to get what you order. As the season advances we run short of certain varieties and while we live in one of the largest bulb growing areas in America, it is almost impossible to obtain additional stocks from other growers after mid-season. We fill orders in the order received, so the earlier your order is in the more certain you are of getting it filled completely.

GUARANTEE—All bulbs are guaranteed true to name, free from disease or pests, and to arrive in good condition. We guarantee to do our utmost to please our customers and will personally see that full value is given in every order. If the bulbs do not give complete satisfaction, advise us at once, and your money will be refunded, upon return of the bulbs at our expense. Although we cannot govern the conditions under which these bulbs will be planted and grown we want it understood that it is our desire that our customers be absolutely satisfied with results obtained. If for any reason they do not perform satisfactorily, please write us about it and if it is proven to be the fault of the bulbs, we will gladly replace them or refund your money.

PREPAID—All prices quoted include delivery charges prepaid by parcel post or express, unless otherwise noted. Always remember that 6 bulbs of a variety can be purchased at the dozen rate; 25 bulbs at the 100 rate. Unless the rate per 100 is quoted, all bulbs listed herein may be purchased by the 100 at 7 times the dozen rate.

SHIPMENTS—Orders will be shipped beginning September 1st or as soon as the Horticultural inspectors issue us our shipping permits. If it would be more convenient for you to have your order sent at a certain date, be sure to notify us far enough in advance so that we can do this. **NO ORDERS ACCEPTED AFTER NOVEMBER 1st.**

SUBSTITUTIONS—We do not substitute without your consent. In ordering late in the season it is advisable to name substitutes, which will greatly assist us in filling your order completely.

TERMS—Customers often lose cash sent in the mails unregistered, so you do this at your own risk. Remittances may be made by check or money order. Stamps will be accepted in payment for small orders. The day your order is received we mail to you a card or letter of acknowledgment; if it does not arrive promptly please let us know so that we may be able to trace it.

EXTRAS—It has always been our custom to add extras to each order. The amount and variety varies with the size of the order. Sometimes the extras consist of additional bulbs of the varieties ordered, at other times they are something different. Rather than send extras of something you already have, we will let you select your own from our retail list. On orders from \$2.50 to \$5.00 you can select 10% extra in stock; from \$5.00 to \$25.00 select 15% extra in stock; from \$25.00 to \$50.00 select 20% extra in stock; and over \$50.00 select 25% extra in stock. This offer does not apply to our bulbs listed under the heading of "Planting Stock" or "Collections".

OLYMPIA

YELLOW TRUMPET DAFFODILS

Letters following varieties represent the time of blooming. E—early, M—medium, L—late.

AEROLITE. E. The large flower is beautifully proportioned, giving the impression of gracefulness, despite its size; perianth deep primrose, with a pure yellow trumpet which is left in bold relief by the broad pointed star formed by the flat opening outer petals, an inch and a half wide. A splendid keeper either in the garden or after being cut. **Each 15c; doz. \$1.25.**

CLEOPATRA. L. A splendid flower with large light yellow trumpet; lemon yellow perianth with overlapping petals. Very late and a splendid keeper. **Each 15c; doz. \$1.25.**

DIOTIMA. E. Considered by many to be the best of the new super-giant yellow trumpets. The flower is beautifully proportioned and is carried gracefully on flattened tapering stems, two feet tall. One of the top-notchers for many years to come. **Each \$2.50.**

DUCHANEL. L. A beautifully balanced flower of giant size. A striking clear self yellow, widely flaring trumpet is deeply frilled. Especially valuable as it is very late; an outstanding show flower. **Each 30c; doz. \$3.00.**

Many impressive awards. **Each \$2.50.**

A Few Suggestions for Growing Daffodils

They will thrive in any well drained garden soil. Prepare the soil deeply, 12 inches or more is best. Plant at least 6 inches deep, extra large bulbs are better planted 7 or 8 inches deep. (Some varieties make larger bulbs than others.) No manure should come in contact with the bulb. If the soil needs fertility, use bone meal at the rate of one-fifth pound to the square yard. This should be thoroughly mixed with the soil under the bulb.

A mulch of straw or leaves will be beneficial in very severe climates. If the mulch is applied after the first freeze, it will prevent thawing and heaving.

"The tulips we got from you last fall were magnificent, quite the loveliest tulips we had. I thought you might like to know how well satisfied we were with the order. We also told several others how much we like your bulbs."
—Mrs. A. B. S., Illinois.

It is our desire to send a copy of our catalog to all flower lovers. It is yours for the asking. But because of the time and expense involved in checking our files and mailing catalogs to flower fans, who for some reason can no longer grow flowers (due to the fact that they have moved into an apartment or have changed their address and we have lost contact with them) we find it necessary to drop names from our mailing list to whom we have sent catalogs for the past two or three years without receiving an order. We regret that we are forced to take this step, but the expense involved in printing and mailing even as modest a catalog as ours amounts to quite a sum of money. We have reduced the prices on many fine varieties of bulbs to the minimum and we must get results. If you have never grown our bulbs, send us a trial order now. Be sure to read our guarantee; not many bulb growers or seed houses guarantee such complete satisfaction. Also, see special discounts listed on page 3.

Producing clusters of fragrant flowers; not recommended for outside planting, except in mild climates.

Bulbs of these varieties, grown in pebbles, can be had in bloom from Christmas until Easter. Upon arrival, plant immediately, if wanted early, and put in a cool place, free from frost. When well rooted they can be taken into heat, the milder the temperature the finer the flowers. For a succession of bloom, plant at intervals of two weeks, keeping unplanted bulbs in a moderately cool temperature and dry. The water requires changing occasionally, a little powdered charcoal added to the water,

PLANTING STOCK

Planting stock is rarely found listed in bulb catalogs as growers prefer to plant their offsets or slabs. In the course of a year or two these slabs grow into the round and double nose bulbs of commerce. A large percentage of these bloom the first season and all should bloom the second year. Anyone wishing to work into the cut flower trade or commercial bulb business would find it to his advantage to acquire stocks in this way. **THIS OFFER EXPIRES AFTER THE 15th OF SEPTEMBER**, when I begin my fall planting. In some cases stocks are limited, so it would be advisable to give second choice. No substitutions will be made unless requested. All prices quoted sent **EXPRESS COLLECT. NOT LESS THAN 25 BULBS OF ONE VARIETY** sold at these prices.

These bulblets are small, about the size of peas. They will make commercial round bulbs the first year; all should bloom the second year. ORDER BEFORE SEPTEMBER 15th.

Per pint, \$1.50; per quart, \$2.50; PREPAID.

Only these 3 varieties of iris available in planting stock: Cajanus, Imperator, Yellow Queen.

HYACINTHS

The most natural, truly graceful Hyacinth plant is produced from medium or small sized bulbs. Hyacinths lose grace and strength when they gain in size. The "Exhibition" size bulbs so commonly offered are not suited for outside planting. They produce large trusses that are far too heavy for the stem to hold upright, and the first wind or rain lays them flat on the ground. This year we are offering only one size bulbs, which are ideal for outdoor culture but not recommended for pot culture or forcing. These bulbs will produce elegant, graceful blooms in the garden and will increase in size each year.

Numbers used in descriptions represent time of blooming, (1) being the earliest and (4) the latest.

BISMARCK. (2) One of the finest blue Hyacinths, large truss and medium deep blue.

CITY OF HAARLEM. (2) The best yellow.

SUNDEW. 20" Best described as a striking red Darwin with a frilled edge. A fine novelty attracting attention whenever seen. Large flowers on stiff stems. **12 for 70c, 100 for \$5.00.**

TULIP CULTURE

Best results are to be had by using soil that Tulips have not been grown in for at least two years. Growing more than two years in the same soil will eventually lead to failure. Do not use manure, if the soil needs fertility, mix bone meal with it at the rate of about three handfuls to the square yard. Plant 5 inches deep and at least 6 inches apart. In very severe climates a mulch of peat moss or leaves will be beneficial. This should be applied after the first freeze, and should not be over one inch deep.

"Well pleased with order." S. B. F., Tenn.

PRINCESS ELIZABETH (See page 18)

PROF. RAUWENHOFF (See page 18)

THE very large flowers and splendid colors of these three varieties of long stemmed tulips, make them universal favorites. Their principal features are their very tall, upright stems and enormous blooms. Their decorativeness in borders or beds is unexcelled, and furthermore, they are cut-flowers of extraordinary quality, bringing a long lasting bouquet of bright cheerful colors into the home.

They can be used for any garden purpose, in clumps or masses they are at their best, but they can be planted as a decoration along the borders of your garden. Scattered along footpaths, or in front of shrubs they produce a particularly picturesque effect. A bed of Inglescombe Yellow or Princess Elizabeth, with bright blue forget-me-nots or pansies planted solidly between the tulips, will make a picture to be long remembered. Their beauty will appeal to you and you will be reluctant to leave your garden.
